

ENT workstations

MODULA

The new Heinemann headquarter is attractively located in Kaltenkirchen and accomodates our sales, manufacturing and service departments. Individual and qualified consulting services are what our customers rely on when turning towards Heinemann. From a first idea to a complete CAD draft, we deliver custom solutions and concepts to our customers.

Continuous international growth lead to formation of Heinemann subsidiaries in Russia and France and appointment of distribution partners in many other countries. Quality and design will always remain our core values in order to stay ahead of the competition.

Since 1983, **Heinemann Medizintechnik** is one of the leading equipment providers in **ENT medical technology**.

The company is not only a **manufacturer** of high-quality ENT treatment units, but also a **competent** partner for practice planning as well as your sales **partner** for complete ENT equipment in **hospitals** and private practices.

Company history

Its profile covers the development, manufacture, sales and distribution of ENT diagnosis devices. The product range also included ultrasound devices for paranasal sinus diagnostics, stroboscopy devices for vocal chord diagnostics and devices for vestibular diagnostics.

- 1983 Foundation of Heinemann Medizintechnik
- 1990 Heinemann introduces the first MODULA ENT Treatment Unit
- 1991 Manufacturing begins in new premises in Hamburg (Hummelsbüttel)
- 1995 Heinemann opens subsidiary in Moscow (Russia). Heinemann on trade fairs in Moscow, Kazan, St. Petersburg, Odessa
- 1996 Heinemann wins tender to equip the Academy of Music in Kazan. Inauguration of the Academy by Boris Jelzin with dedication to Heinemann Medizintechnik
- 1997 Heinemann delivers ENT units to Bolshoi Theater in Moscow
- 1998 Heinemann opens office in Schönfeld (Perleberg)
- 2004 Introducing of new caloric air & water irrigators
- 2006 Introducing of a new VNG mask
- 2007 Development of a new small mobile ENT treatment unit "MODULA mini"
- 2008 Heinemann Medizintechnik is named official distributor of PHILIPS Medical Systems in Russia
- 2010 Many updates on ENT Treatment Units: LED cold light, glass control panel, antibacterial color coating, etc.
- 2011 Heinemann wins tender for 80 ENT Treatment Units to the Republic of Belarus
- 2012 Heinemann wins tender for healthcare modernization programme in Moscow: 251 ENT work stations delivered to Moscow area
- 2013 Completion of our new company home in Kaltenkirchen. Placed on a 6000 m² property, the new production facility has been built using latest technologies in order to provide sustainability and capacity for continuous production volume increase in the coming years. The 1600 m² production facility is dimensioned to provide capacity for further anticipated growth.

In the future, quality and design will remain our priorities in order to stay ahead of the market.

MODULA mini ○

Mobility and efficiency

Mobility and efficiency

Image does not show standard equipment

Product description

MODULA mini is our most compact unit, yet offering all essential features. Despite its small dimensions, this unit can be equipped with almost all features of the MODULA product portfolio. This space-saving unit offers automatic or manual suction systems, up to 3 cold light sources (halogen or LED), endoscope quivers for rigid and flexible endoscopes and much more.

MODULA mini is the right unit for very small examination rooms or to serve as a backup unit with essential functions. MODULA mini is a small mobile unit which can be moved between examination rooms. If more space is needed an instrument cabinet is also available in the same design in order to store additional instruments.

Standard equipment

- High quality electrolytic zincplated steel cabinet
- Stoved enamel antibacterial powder coating in 20 colours
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- Electronic operating and display system: robust, user-friendly glass control panel with touch-sensitive function keys
- Instrument holder for irrigation, compressed air and suction handles
- Integrated rapid mirror warmer, with fan
- max. 4 drawers, fully extending with soft close system
- 3 disinfection quivers for rigid endoscopes with protective silicone adapter

Technical details:

Mains voltage, mains frequency:	230 V (+/- 10 %) at 50/60 Hz
Power consumption:	max. 2.3 kVA at 10 A
Classification:	IIa
Protection category:	I
Degree of protection:	B
Motor suction (optional):	Vacuum pump (oil-free, suction capacity 40 l/min at -0.85 bar, 150 VA), electronic and mechanical overfill protection, bacterial filter
Compressed air (optional):	12 l/min at 2,700 rpm and 138 VA, optionally adjustable from 0.2 to 2.5 bar
Ear irrigation with continuous flow heating (optional):	+37° C +/-1° C, 500 ml/min, max. 1,500 VA (when heating)
Ear irrigation with water heater system (optional):	+37° C +/-1° C, 500 ml/min, max. 550 VA (when heating)
Water tank (optional):	5 litres
Light source, halogen (optional):	150 VA, 15 V
Light source, LED (optional):	30 VA, 12 V
Total weight:	approx. 60 kg (depending on equipment)
Dimensions (WxHxD):	410 x 790 x 585 mm
Ambient temperature:	from +5° C to +35° C

MODULA Paris ○

Maximum equipment
occupying minimal space

Image does not show standard equipment

Product description

MODULA Paris – the complete functional scope in a small space. If you only have limited space available or you need a second, small unit with specific functions, this is the treatment unit for you. This treatment unit offers the complete range of functions of large treatment units (e.g., MODULA Europa). Despite its compact size, the MODULA Paris offers plenty of space for instruments and devices. It can be equipped with instrument trays on up to three levels (one extendable) or a gallery.

Standard equipment

- High-quality, electrolytically galvanised sheet steel housing
- Stoved enamel antibacterial powder coating in 20 colours
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- Electronic operating and display system: robust, user-friendly glass display with touch-sensitive function keys
- Instrument holder for irrigation, compressed air and suction handles, swivelling
- Integrated rapid mirror warmer, with fan
- 2 fully extendable and soft closing drawers
- 3 disinfection quivers for rigid endoscopes with protective silicone adapter
- 2 instrument levels with stainless steel instrument trays
- Indirect illumination for instrument levels
- Acrylic glass instrument cover, sinkable behind the cabinet
- Stainless steel instrument tray for used instruments with silicone insert
- Waste bin, opening with foot pedal (self-closing)
- Pull-out writing/preparation desk with stainless steel surface

MODULA Europa

**Complete equipment and
optimal storage possibilities**

Image does not show standard equipment

● *Product description*

MODULA Europa – stands for large product variety and individual equipment possibilities. Installed desk, PC workstation, swivel arm or upper shelf for different units – we design and produce the unit to suit your requirements. The MODULA Europa is the optimal size so that not only can all components be optimally placed, but there is also a wide range of storage possibilities to choose from for instruments. You can choose from fully extendable drawers as well as instrument shelves with flat stainless steel trays on up to three levels.

● *Standard equipment*

- High-quality, electrolytically galvanised sheet steel housing
- Stoved enamel antibacterial powder coating in 20 colours
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- Electronic operating and display system: robust, user-friendly glass display with touch-sensitive function keys
- Instrument holder for irrigation, compressed air and suction handles, swivelling
- Integrated rapid mirror warmer, with fan
- 4 fully extendable and soft closing drawers
- Pull-out writing/preparation desk with stainless steel surface
- 3 disinfection quivers for rigid endoscopes with protective silicone adapter
- 2 instrument levels with stainless steel instrument trays
- Indirect illumination for instrument levels
- Acrylic glass instrument cover, sinkable behind the cabinet
- Melamine instrument tray for used instruments with silicone insert
- Waste bin, opening with foot pedal (self-closing)

MODULA Duo

Variability and innovation
Variability and innovation

Image does not show standard equipment

Product description

MODULA Duo – this name stands for the flexibility of the construction and an optimal combination of functional components and instrument storage possibilities. The function module and additional cabinet module are connected with a joint. This creates the possibility for adapting the treatment unit individually to suit your treatment position.

The light module is located between the two module parts and houses a modern control and display unit made of glass. It can be equipped with up to 4 cold light sources (halogen or LED), heatable endoscope holders, disinfection quivers and a holder for flexible endoscopes.

Standard equipment

- High-quality, electrolytically galvanised sheet steel housing
- Stoved enamel antibacterial powder coating in 20 colours
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- Electronic operating and display system: robust, user-friendly glass display with touch-sensitive function keys
- Instrument holder for irrigation, compressed air and suction handles, swivelling
- Integrated rapid mirror warmer, with fan
- 6 drawers, fully extending with soft close system
- Pull-out writing/preparation desk with stainless steel surface
- 4 disinfection quivers for rigid endoscopes with protective silicone adapter
- 2 instrument levels with stainless steel instrument trays
- Indirect illumination for instrument levels
- Acrylic glass instrument cover, sinkable behind the cabinet
- Stainless steel instrument tray for used instruments with silicone insert
- Waste bin, opening with foot pedal (self-closing)

Image does not show standard equipment

- 1 Irrigation handle, compressed air sprayer, suction hose
- 2 Glass display as a display and control element
- 3 Instrument trays on up to three levels
- 4 LED or halogen cold light sources
- 5 Antibacterial tubes with quick connectors
- 6 Endoscope quivers
- 7 Rinsing system for suction tube

- 8 Instrument cabinet
- 9 Fully extendable and soft closing drawers
- 10 Stainless steel instrument tray
- 11 Mirror warmer
- 12 Robust design featuring high-quality materials
- 13 Waste bin
- 14 Upper shelf above instrument level

● Example ENT workstation

Ear rinsing system					
+37° C ear irrigation system with continuous flow heating: digital temperature display, irrigation handle with exchangeable cannula, antibacterial handle tube with quick connector incl. aqua-stop valve and connection tubes (water purification filter additionally required)	0130-10000	●	●	●	●
Vestitherm expansion for caloric stimulation in vestibular examinations, temperature can be set from +22° C to +44° C (only in combination with REF: 0130-10000)	0130-11000	●	●	●	●
+37° C autonomous ear irrigation system: water heater, external water tank (5 litres). Independent of domestic water supply, antibacterial handle tube with quick connector (water purification filter additionally required)	0130-12000	●	●	●	●
Water purification filter (disposable: lifespan 4 weeks), for insertion between the irrigation handle and cannula	0130-42000	●	●	●	●
Ear rinsing bowl, adaptable to connection tube	0130-50000	●	●	●	●
Sink/spit bowl, adaptable to connection tube	0130-50010	●	●	●	●
Irrigation cannula for irrigation handle, length 40 mm	0130-50027	●	●	●	●
Irrigation cannula for irrigation handle, length 80 mm	0130-50025	●	●	●	●
Irrigation cannula for irrigation handle, length 110 mm	0130-50026	●	●	●	●
Splash guard for irrigation cannula (acrylic glass)	0130-50030	●	●	●	●
Compressed air system					
Compressed air unit: compressor (oil-free, 12 l/min, max. 2.5 bar) stainless steel pressure container, chrome-plated compressed air handle, antibacterial handle tube with quick connector incl. 3 medicament sprayer and stainless steel holder for spray bottles	0140-10000	●	●	●	●
Compressed air control valve for fine adjustment (required for Politzer manoeuvre or use on children)	0140-50000	●	●	●	●
Plastic Politzer olives, set with 3 different sizes (small, medium, large)	0140-21300	●	●	●	●
Plastic Politzer olive, small (15 mm)	0140-21301	●	●	●	●
Plastic Politzer olive, medium (18 mm)	0140-21302	●	●	●	●
Plastic Politzer olive, large (22 mm)	0140-21303	●	●	●	●
Medicament sprayer for liquids, complete with sprayer attachment and bottles	0140-60101	●	●	●	●
Medicament sprayer for powders, complete with sprayer attachment and bottles	0140-60102	●	●	●	●
Drug nebuliser for liquids, with detachable and autoclavable front part, 1 pc. (without bottle)	0140-60107	●	●	●	●
Detachable front part for drug nebuliser (only for REF 0140-60107)	0140-60109	●	●	●	●
Nebuliser bottles for liquids, 1 pc.	0140-60104	●	●	●	●
Nebuliser bottles for powder, 1 pc.	0140-60106	●	●	●	●

Stainless steel tongue depressor holder, medium (4 rows)	0160-21210	●	●	●	-

Instrument cabinets

Are you looking for stable, spacious and mobile instrument cabinets or charts? We offer a wide range of instrument cabinets and video charts, which not only have the same design as the MODULA treatment units, but which you can also customize to suit your personal requirements.

All the cabinets and trolleys are composed of a stable, electrolytically galvanised plate housing with powder-coated stoved enamelling. The cabinets are all mobile and equipped with an acrylic glass cover. We offer you every model with basic equipment that you can expand to suit your requirements. Not only can you select the individual components in and on the cabinet however you wish, but you can also even choose the colour of the cabinet (20 RAL colours).

HANSEAT-L

REF: 0300-10100

- High-quality, electrolytically galvanised sheet steel housing
- Powder-coated stoved enamelling in RAL colours (see standard colour table)
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- 4 fully extendable and soft closing drawers
- 2 instrument levels with stainless steel trays
- **Melamine instrument tray for used instruments**
- **Waste bin opened with foot pedal, closes quietly automatically**
- Acrylic glass instrument cover, sinkable behind the cabinet
- Pull-out writing/preparation desk with stainless steel surface
- Indirect illumination for instrument levels

HANSEAT-XL

REF: 0300-10000

- High-quality, electrolytically galvanised sheet steel housing
- Powder-coated stoved enamelling in RAL colours (see standard colour table)
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- 4 continuous drawers, fully extending with soft close system
- 2 instrument levels with stainless steel trays
- Acrylic glass instrument cover, sinkable behind the cabinet
- Pull-out writing/preparation desk with stainless steel surface
- Indirect illumination for instrument levels

HANSEAT-M

REF: 0300-20000

- High-quality, electrolytically galvanised sheet steel housing
- Powder-coated stoved enamelling in RAL colours (see standard colour table)
- Mobile unit with stainless steel base, antistatic heavy-duty castors
- 4 fully extendable and soft closing drawers
- 2 instrument levels with stainless steel trays
- Acrylic glass instrument cover, sinkable behind the cabinet
- Indirect illumination for instrument levels

Options for HANSEAT Instrument cabinets	REF	M	L	XL
LED instrument illumination with changing RGB colours (red, green, blue) incl. remote control	0110-20010	●	●	●
3 rd instrument level with extendable central level (not together with REF: 0110-20025)	0110-20000	●	●	●
Heatable instrument storage surface (only for the top level respectively)	0110-20020	-	●	●
Mirror warming block for approx. 50 mirrors (not together with REF: 0110-20025 or 0110-20025)	0110-20110	-	●	●
Storage compartment for medicament bottles, integrated in the instrument level (not together with REF: 0110-20110)	0110-20025	●	●	●
Upper shelf above instrument level with powder-coated aluminium shelf (integrated board surface for devices)	0110-20060	-	●	●
Upper shelf above instrument level with matt acrylic glass shelf (integrated board surface for devices)	0110-20065	-	●	●
Lower shelf (instead of drawer)	0110-21000	●	●	-
Flat, half-open drawer for instruments	0110-21300	●	●	-
Storage compartment with door (instead of waste bin)	0110-21200	-	●	-
Cotton wool and tongue swab dispenser (integrated in the unit)	0110-20135	●	●	-
Desk extension M (approx. 100 cm extension)	0110-20160	●	●	●
Desk extension M with sliding keyboard shelf (approx. 100 cm extension)	0110-20165	●	●	●
Desk extension L (approx. 120 cm extension)	0110-20170	●	●	●
Desk extension L with sliding keyboard shelf (approx. 120 cm extension)	0110-20175	●	●	●
Stand column + monitor holder for 10" to 22" TFT monitor (installation on unit)*	0110-71035	●	●	●
Swivel arm with storage board, size 2, 312 x 358 mm (installation on microscope column or stand column)*	0110-71041	●	●	●
Swivel arm with storage board, size 1, 268 x 278 mm (installation on microscope column or stand column)*	0110-71042	●	●	●

*Only one swivel arm on the stand or microscope column respectively

Patient chairs

MODULA 2.SA (hydraulic)

Top: can be rotated and locked with the foot pedal, armrests made of integral foam can be individually folded away backwards, backrest can be tilted approx. 10° forward from upright and backward until horizontal.

Base: height-adjustable via **hydraulic oil pump** using the foot pedal, 200 mm range (540 - 740 mm), chrome-plated steel parts.

Fixed foot rest

Fixed big foot rest,
foldable plate

Ordering Information	REF
MODULA 2.SA with hydraulic height adjustment	553-4612000
MODULA 2.SA as above, but with additional 90°-rotatable seat	553-4622000
Fixed foot rest, chrome-plated	553-1330850
Fixed big foot rest, chrome-plated	553-1330900
Fixed big foot rest, foldable plate, chrome-plated	553-1337100

MODULA 3.SA (electromechanical)

Top: backrest can be infinitely adjusted between +9° and -90° via a lockable gas spring, adjusting lever on both sides. Armrests made of integral foam; when the backrest is adjusted, they drop to the correct surface height synchronously.

Base: electromechanical range 300 mm (580 - 880 mm), can be rotated and locked 360°, base diameter 70 cm, separate foot pedal for adjusting the height of the seat

Ordering Information	REF

Fixed big foot rest, chrome-plated	553-1330900
Fixed big foot rest, foldable plate, chrome-plated	553-1337100

MODULA 4.SA (electromechanical, synchronous)

Top: backrest can be infinitely adjusted between +9° and -90° via a lockable gas spring, lever on both sides for adjusting backrest, armrests made of integral foam, can be swivelled approx. 100° backwards. When the backrest is adjusted, they drop to the correct surface height synchronously.

Base: electromechanical range 300 mm (580 - 880 mm), can be rotated and locked 360°, base diameter 70 cm, separate foot pedal for adjusting the height of the seat, synchronous leg component whereby the foot bar swings up into the lying position.

Ordering Information		REF
MODULA 4.SA with synchronous adjustment of the lying surface		553-4636100
MODULA 4.SA as above, but with additional 90°-rotatable seat		553-4646100

MODULA 5.SA (synchronous, fully electrical)

Top: backrest can be **infinitely adjusted via an electric motor**, between +9° and -90°, lever on both sides for adjusting backrest, armrests made of integral foam, can be swivelled approx. 100° backwards. When the backrest is adjusted to the horizontal position, they drop to the correct surface height synchronously. Grip on front of armrest

Base: electromechanical range 300 mm (580 - 880 mm), can be rotated and locked 360°, base diameter 70 cm, separate foot pedal for adjusting the height of the seat and backrest, synchronous leg component whereby the foot bar swings up into the lying position.

height adjustment
580 - 880 mm
