Easmed is a medical device distributor serving Southeast Asia for over 14 years. We bring quality and trust in the products under our distribution network.

To understand mask quality differences, it is important to understand the standards which the products are certified and tested for.

Type of facial protection:

**Surgical Masks**
- Also known as face mask or medical mask
- Quality & Protection effectiveness may vary widely
- Non Medical Grade versions:
  > BFE between 30%–90%; Breathability unclear
  > Untested nor governed by any standards
- Medical Grade versions:
  > BFE >/= 95%; Breathability & Microbial tested
  > Follow European Standards EN 14683/
    US ASTM F2100/ China YY/T0969 or YY0469

**Respirators**
- Must be worn with right fit to create facial seal
- Used in both industrial and medical field
- Versions include N95, KN95, N99, PAPR etc
- Generally tested for:
  > PFE >/= 94%, Breathability, Mask Leakage
  > Follow European Standards EN 149/
    US NIOSH/ China GB19083/ GB2626

BFE: Bacterial Filtration Efficiency (3.0 Microns)
PFE: Particle Filtration Efficiency (0.1–0.3 Microns)
