

PneumoClear

the smart insufflator

The first
all-inclusive
insufflation system

Consistently clear images

- Smart inflow and outflow management designed to maintain stability while actively evacuating smoke.

Control of your environment

- Addresses fluctuations in pressure with newly developed operating modes.
- Helps control your operation by addressing fluctuations in pressure and improving post-operative patient recovery through the use of heated and humidified CO₂ vs. cold and dry insufflation¹

All-in-one integration

- All-inclusive system of heated and humidified CO₂ with active smoke evacuation in a single lightweight and flexible tube set.

One source to satisfy all insufflation needs
