

SPiN System™

Localization Solutions

SPiN THORACIC NAVIGATION SYSTEM™

- + Mark nodules in the OR immediately before resection
- + Plan and precisely place fiducial markers for SBRT

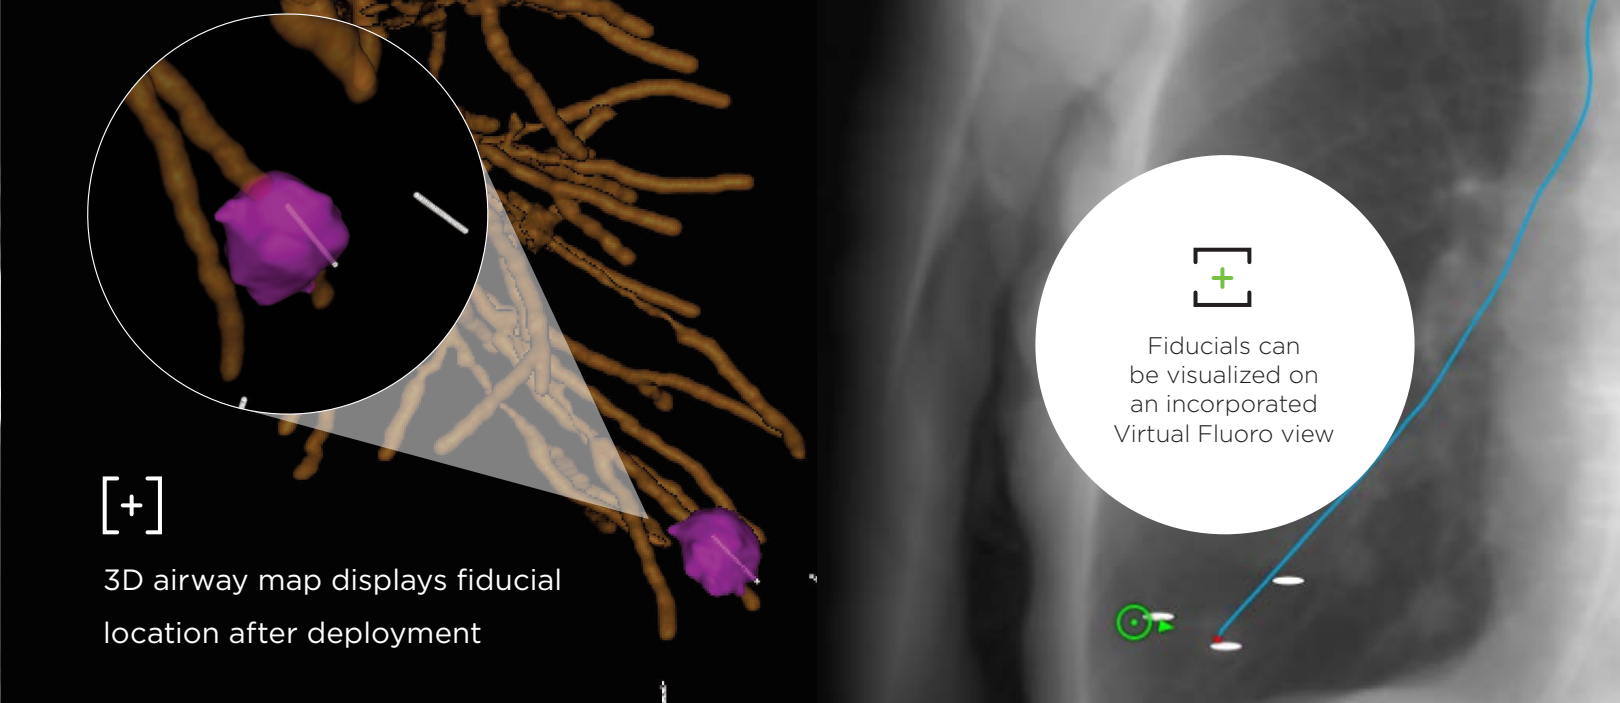

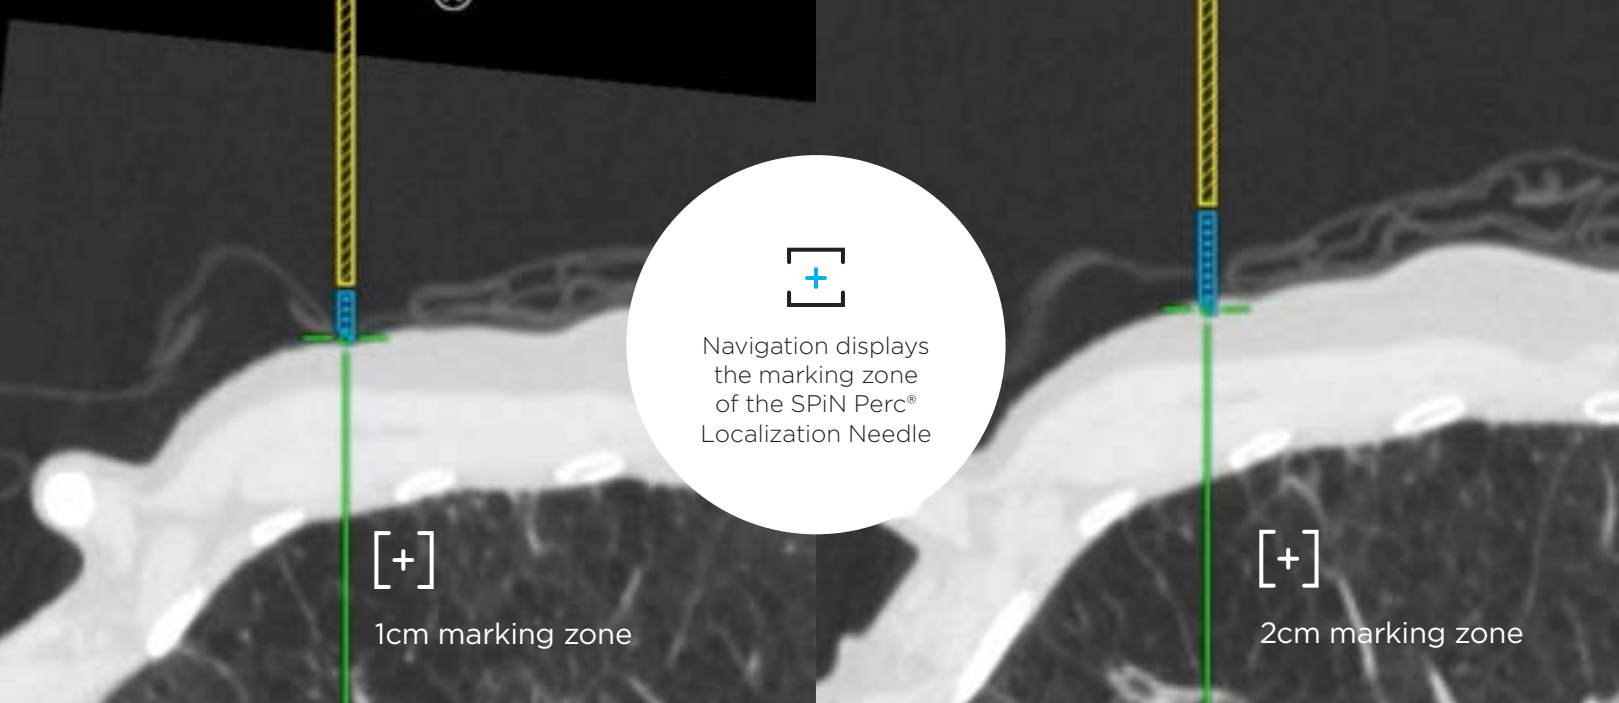

More approaches

In addition to a bronchoscopic approach, the SPiN System™ also provides a transthoracic option. SPiN Perc™ is an Always-On Tip Tracked® Needle that enables you to seamlessly transition from a navigated bronchoscopy to a navigated transthoracic approach. With SPiN, you can localize with dye markers or fiducial markers endobronchially, percutaneously—or both.

[+] **SPiN PERC® NEEDLE**
Always-On Tip Tracked® 19ga x 105mm
Also available: 19ga x 155mm

Dye Marker Placement

- + Precisely mark ground glass and small nodules with real-time navigation guidance.
- + Localize nodules percutaneously in the OR immediately before resection.
- + Laser etched holes in the sides of the needle provide precise localization of 1cm or 2cm zones.

Fiducial Marker Placement

- + Place fiducial markers endobronchially, percutaneously, or both.
- + Plan location for fiducial placement and report on exact deployment.

SPiN PERC® LOCALIZATION NEEDLE

19ga needle with 1cm marking zone.
Also available with 2cm marking zone.

Fiducial Marker Report

See the distance between fiducials and target

	FIDUCIAL 1	FIDUCIAL 2	FIDUCIAL 3	TARGET
FIDUCIAL 1	—	20.1mm	27mm	4mm
FIDUCIAL 2	20.1mm	—	39.6mm	24.2mm
FIDUCIAL 3	27mm	39.6mm	—	25.8mm

Always-On Tip Tracked® Instruments

Always-On Tip Tracked® instruments feature electromagnetic sensors that enable you to see your instrument all the way to the target for precise localizations. These instruments are commonly used:

SPiN PERC® LOCALIZATION NEEDLE

to inject dye markers

ALWAYS-ON TIP TRACKED® SPiN PERC® NEEDLE

to inject dye markers, or load and
deploy fiducial markers percutaneously

ALWAYS-ON TIP TRACKED® NEEDLES

to inject dye markers, or load and
deploy fiducial markers

ALWAYS-ON TIP TRACKED® BRUSHES

to load and deploy fiducial markers
