

Bioresorbable nasal dressings

The support
you need.

**The options
you want.**

NasoPore[®]

standard, firm, extra firm and FD
(fast degrading) fragmentable nasal dressing

NasoPore dressings help foster healing

- ✓ Separates and **supports** vital tissue structures
- ✓ **Comfortably** drains from the nasal cavity via natural mucus flow
- ✓ Provides hemostasis through compression **options**

Support

NasoPore dressings provide a reliable stent for 36-48 hours after placement.

By keeping its shape integrity for those critical hours, NasoPore dressing can help minimize postoperative complications and increase patient satisfaction.

Options

Every NasoPore nasal dressing contains the same core benefits you need and the options you want.

NasoPore nasal dressings provide different fragmentation periods, compression strengths and sizes. You have the option to choose the dressing that suits your preference and your patients needs.

Dressing	Size(s)	Compression strength	Fragmentation time
Standard	4 cm and 8 cm	1 Gentle	7 10
Firm	4 cm and 8 cm	Firm 5	10 12
Extra firm	4 cm and 8 cm	Extra firm 11	12 14
Fast degrading	8 cm	Firm 7	5 7

* Fragmentation may vary based on patient and environmental factors, amount of material inserted and the type and manner of nasal rinsing.

Comfort

NasoPore bioresorbable nasal dressing was designed for patient comfort and convenience while providing you simplicity and ease-of-use.

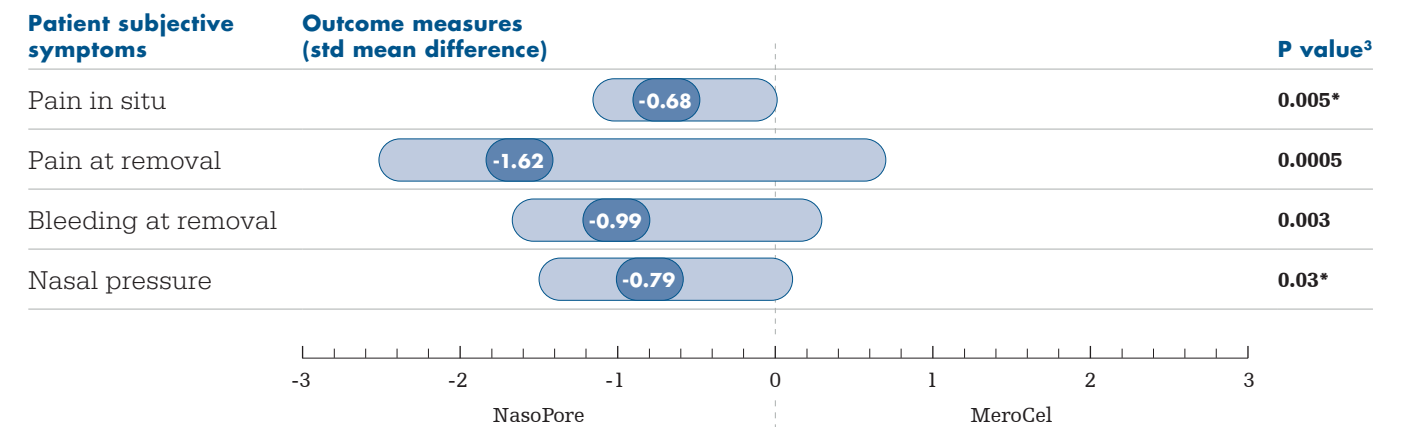

- Easy to cut and manipulate during placement
- No mixing, advance moistening or other prep needed
- No need for manual removal, eliminating potential tissue injury or patient discomfort

75%
of patients couldn't tell which nostril the dressing was in, a testament to the natural feel and comfort of NasoPore dressing¹

100%
synthetic;
no biological components

Patient outcomes from Wang, et al. Meta-analyses of 7 randomized controlled trials comparing Nasopore versus MeroCel²

* Bold p values indicate statistically significant difference as the alpha level of 0.05 in favor of NasoPore compared with MeroCel
